

STRING

Connecting cities and regions for a greener future

Hydrogen as a fuel for the future

“

The Commission's economic recovery plan 'Next Generation EU' highlights hydrogen as an **investment** priority to boost economic **growth** and resilience, create local **jobs** and consolidate the EU's **global leadership**.

STRING – *Connecting regions and cities for a greener future*

STRING hydrogen corridor

Project targets

Infrastructure:

Deployment of a min. of **12 hydrogen refuelling stations** in the STRING region.

Vehicles:

Establishment of a fleet of up to **570 hydrogen heavy-duty vehicles** in the STRING region.

Public-private partnership:

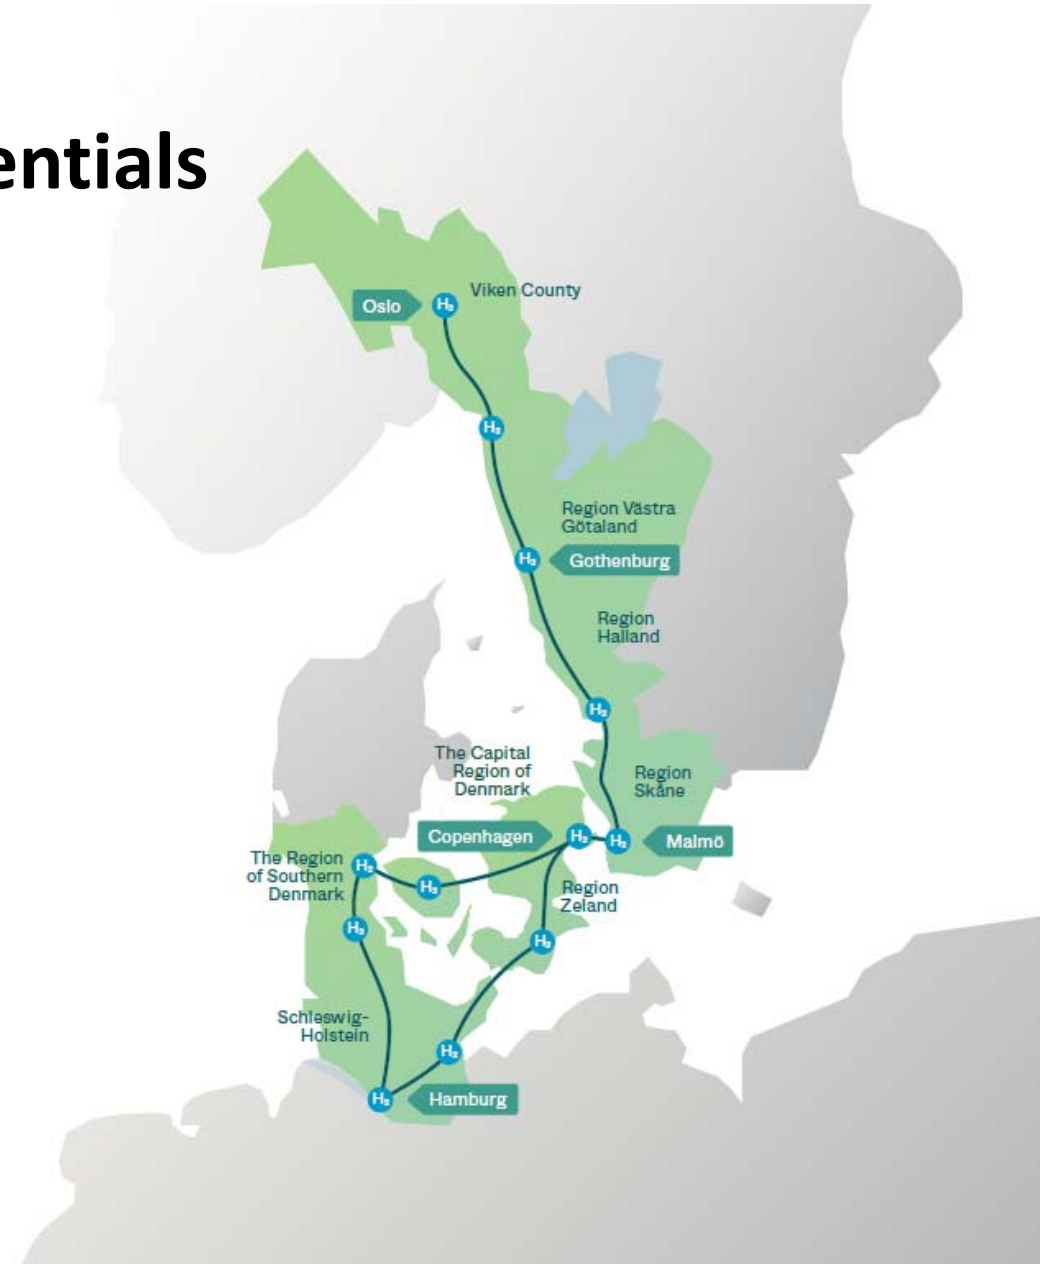

The project builds on a consortium of public and private partners along the hydrogen value chain.

→ Application for EU-funding in summer 2021!

Tapping into great regional potentials

- EU plans to invest up to 470 billion euros into hydrogen technology
- Estimated to create up to 1 million jobs before 2050
- Region is already home to world leading green tech companies for hydrogen
- Regional wind industry -> optimal preconditions for the production and supply of hydrogen
- Innovation-friendly environment

A regional frontrunner!

- Driver for regional innovation, attracting investments, talent and businesses to Northern Europe
- Our concrete answer to EU targets for CO2 reduction from heavy-duty transport and the alternative fuels directive
- Sustainable cross-border infrastructure strengthening trade in Northern Europe
- Establishment of entirely new industrial branch
- Implementation of EU, national and regional H2-strategies
- An international frontrunner region for the production, application and export of hydrogen

Thank you for your attention!
