

TEN-T Core Network Corridors

The Scandinavian-Mediterranean Corridor

17th Corridor Forum Meeting
Brussels, 28.09.2022

1

Agenda of the 17th Corridor forum meeting 28.09.2022

1	Opening, Welcome, past Activities by <i>Pat Cox, European Coordinator TEN-T CNC ScanMed</i>
2	Tour de corridor: Introduction of Corridor Forum Members
3	Adoption of the Agenda, and the Minutes of Meeting of the Corridor (Forum) Meeting 25.11.2021
4	State of Play of the TEN-T CNC study <i>by Consultant team</i> - General overview on study progress and ongoing tasks - Results of the Project Implementation Report 2022-1 and Outlook PIR 2023-1
5	Presentation of the 5th Work Plan <i>by European Coordinator</i> - Key aspects, conclusions and recommendations Questions & Answers, Feedback from Corridor Forum members
	Coffee Break
6	Report from ongoing or recently completed Projects on the ScanMed Corridor - Westlänken/Westlink <i>by Karin Malmquist, Trafikverket</i> - Port of Palermo <i>by Flora Albano, Port Authority System of the Western Sicilian Sea (Palermo)</i> Questions and Answers; Feedback from CF members
7	Reports from DG MOVE / CINEA - TEN-T Revision process and amended proposal <i>by Martin Zeitler, MOVE B1</i> - CEF 2021 call results on ScanMed and CEF Calls on MM and AFID <i>by Thomas Lazzeri, CINEA</i>
8	Information on upcoming Coordinator's activities <i>by Martin Zeitler, MOVE B1</i> - Ideas Laboratories / virtual meetings with the Coordinator - 18th Corridor Forum Meeting in spring 2023
9	Any other business (e.g. news from stakeholders)
10	Conclusions / wrap-up by <i>Pat Cox, European Coordinator</i>

Date: 28 September 20222

Back-up

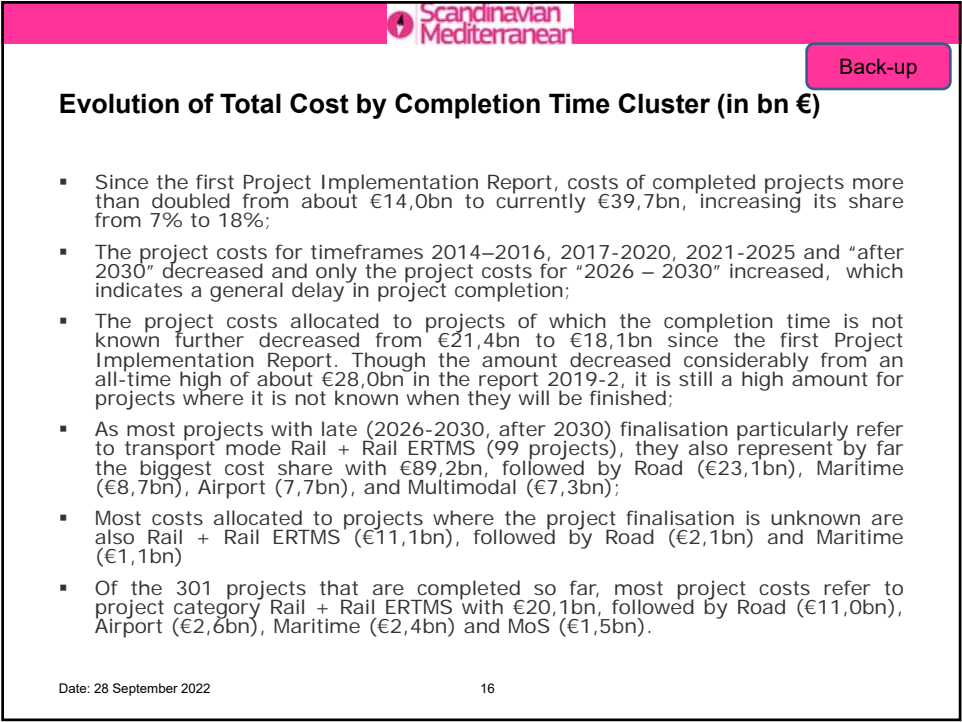

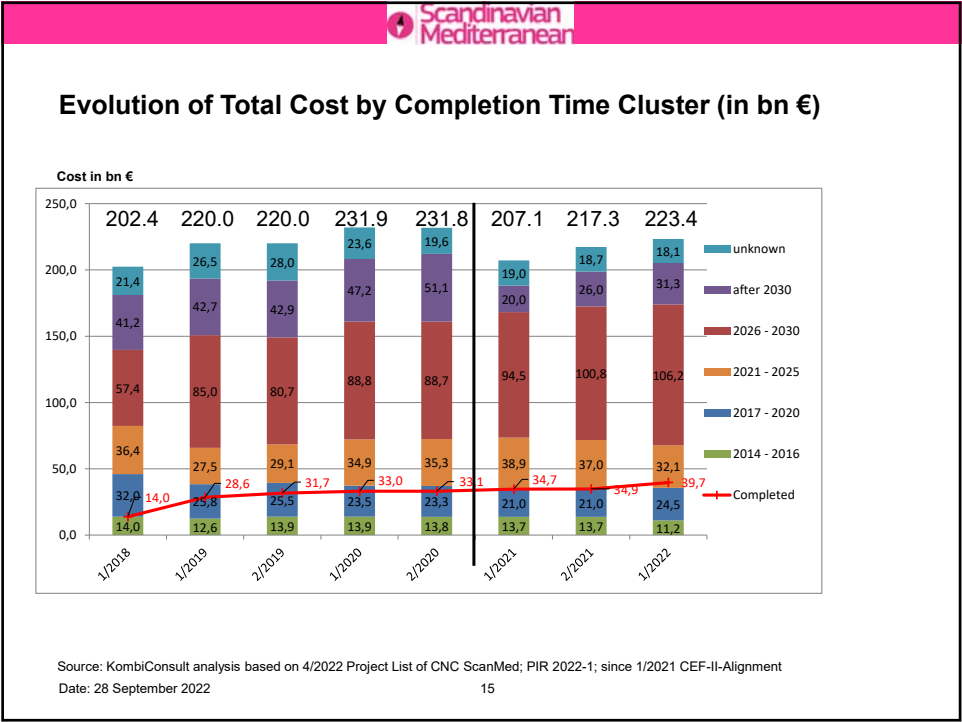

Evolution of Maturity criteria “expected completion time” (N°)

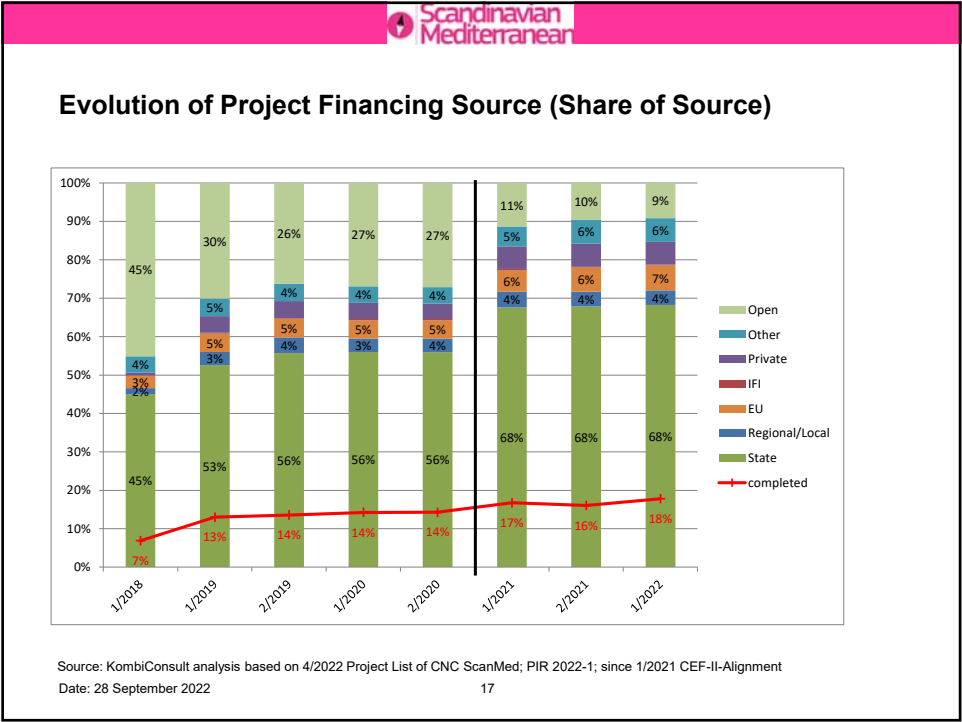

- Since the first Project Implementation Report, 233 ScanMed relevant projects have been added to the Project List. Considering that projects were deactivated meanwhile, this number might be higher. The number of projects relevant for the ScanMed corridor thus increased from 666 projects in the first Project Implementation Report up to 899 projects in the current Project Implementation Report;
- Since the first Project Implementation Report (project status 11/2017), further 227 projects were completed (project status 12/2021). The number of completed projects thus increased from 74 (11% share) to 301 projects (33% share), meaning about one third of the envisaged projects;
- The number of projects for which the completion time is unknown, decreased by 59 projects from 151 to 92, despite the fact that at least 233 projects were added to the project list meanwhile;
- The number of projects, for which the completion time is beyond 2030, increased from 11 to 25 projects;
- Projects with late (2026-2030, after 2030) finalisation particularly refer to transport mode Rail + Rail ERTMS with 99 projects in these time clusters, followed by Road (59) and Maritime (44);
- Most projects where the finalisation is unknown are of the same categories with 21 Rail + Rail ERTMS projects, followed by 18 Maritime projects and 15 Road projects;
- Of the 301 projects that are completed so far, most projects refer to project category Road (67), followed by Rail + Rail ERTMS (58), Maritime (56), MoS and Airport (40 each) and Multimodal (25).

Evolution of Punctuality 1/2018-12/2021

Back-up

- For the intermodal rail service B between a Baltic Sea Port and a freight hub in Northern Italy which focuses on general cargo the respective times and punctuality figures were obtained in order to be monitored over a period of time.
- The number of trains increased from 433 (both directions) in the first half of 2018 to 641 in the first six month of 2021 (+43%) while the number declined to 599 trains in the last period. The Commission's threshold of 20 services per month could be outreached in every reporting period.
- Punctuality of the south-north trains was usually better than the opposite direction despite the last period. Both directions showed a positive development until the 4th reporting period (2020), whereas the quality declined after that. For the north-south trains the punctuality - if a delay of one hour is accepted – decreased from 48% to 30% with a high of 75% in the first half of 2020, and for the opposite direction it decreased from 65% to 35%, despite a high of 81% in the second half of 2019.

5th Work Plan of the European Coordinator

1. Towards corridor 5th Work Plan

2. Characteristics of the Corridor

3. What has still to be realised by 2030

4. Deployment Plans of MoS & ERTMS

5. Funding and Financing

6. The European Coordinator recommendations and future outlook

Basis:

- “CEF-II” Alignment
- KPIs (status June 2021)
- Updated Project list 2021 (status 10/2021)
- Corridor Fora, Working Groups and Coordinator's missions
- Analysis by consultants
- Specific aspects from ERTMS & MoS Studies

Goal:

- Shorter document
- Keep technical details to minimum
- Common texts by DG MOVE
- Focus on key issues & messages that need to be conveyed
